A dramatic, low-key photograph of a city skyline, likely San Francisco, with several prominent skyscrapers visible. The scene is dominated by a massive, dark, and turbulent tsunami wave that is crashing towards the city, partially obscuring the buildings. The sky is a pale, hazy grey, and the overall mood is one of impending disaster and chaos. The text is overlaid on the lower half of the image, and a solid orange bar is at the bottom.

The AI tsunami will
dominate the workplace

**AI will
change
everything**

Understand AI like
PCs in the 80s and
Internet in the 00s

3 stages of AI

Narrow AI

Dedicated to assist with or take over specific tasks

General AI

Takes knowledge from one domain, transfers to other domain

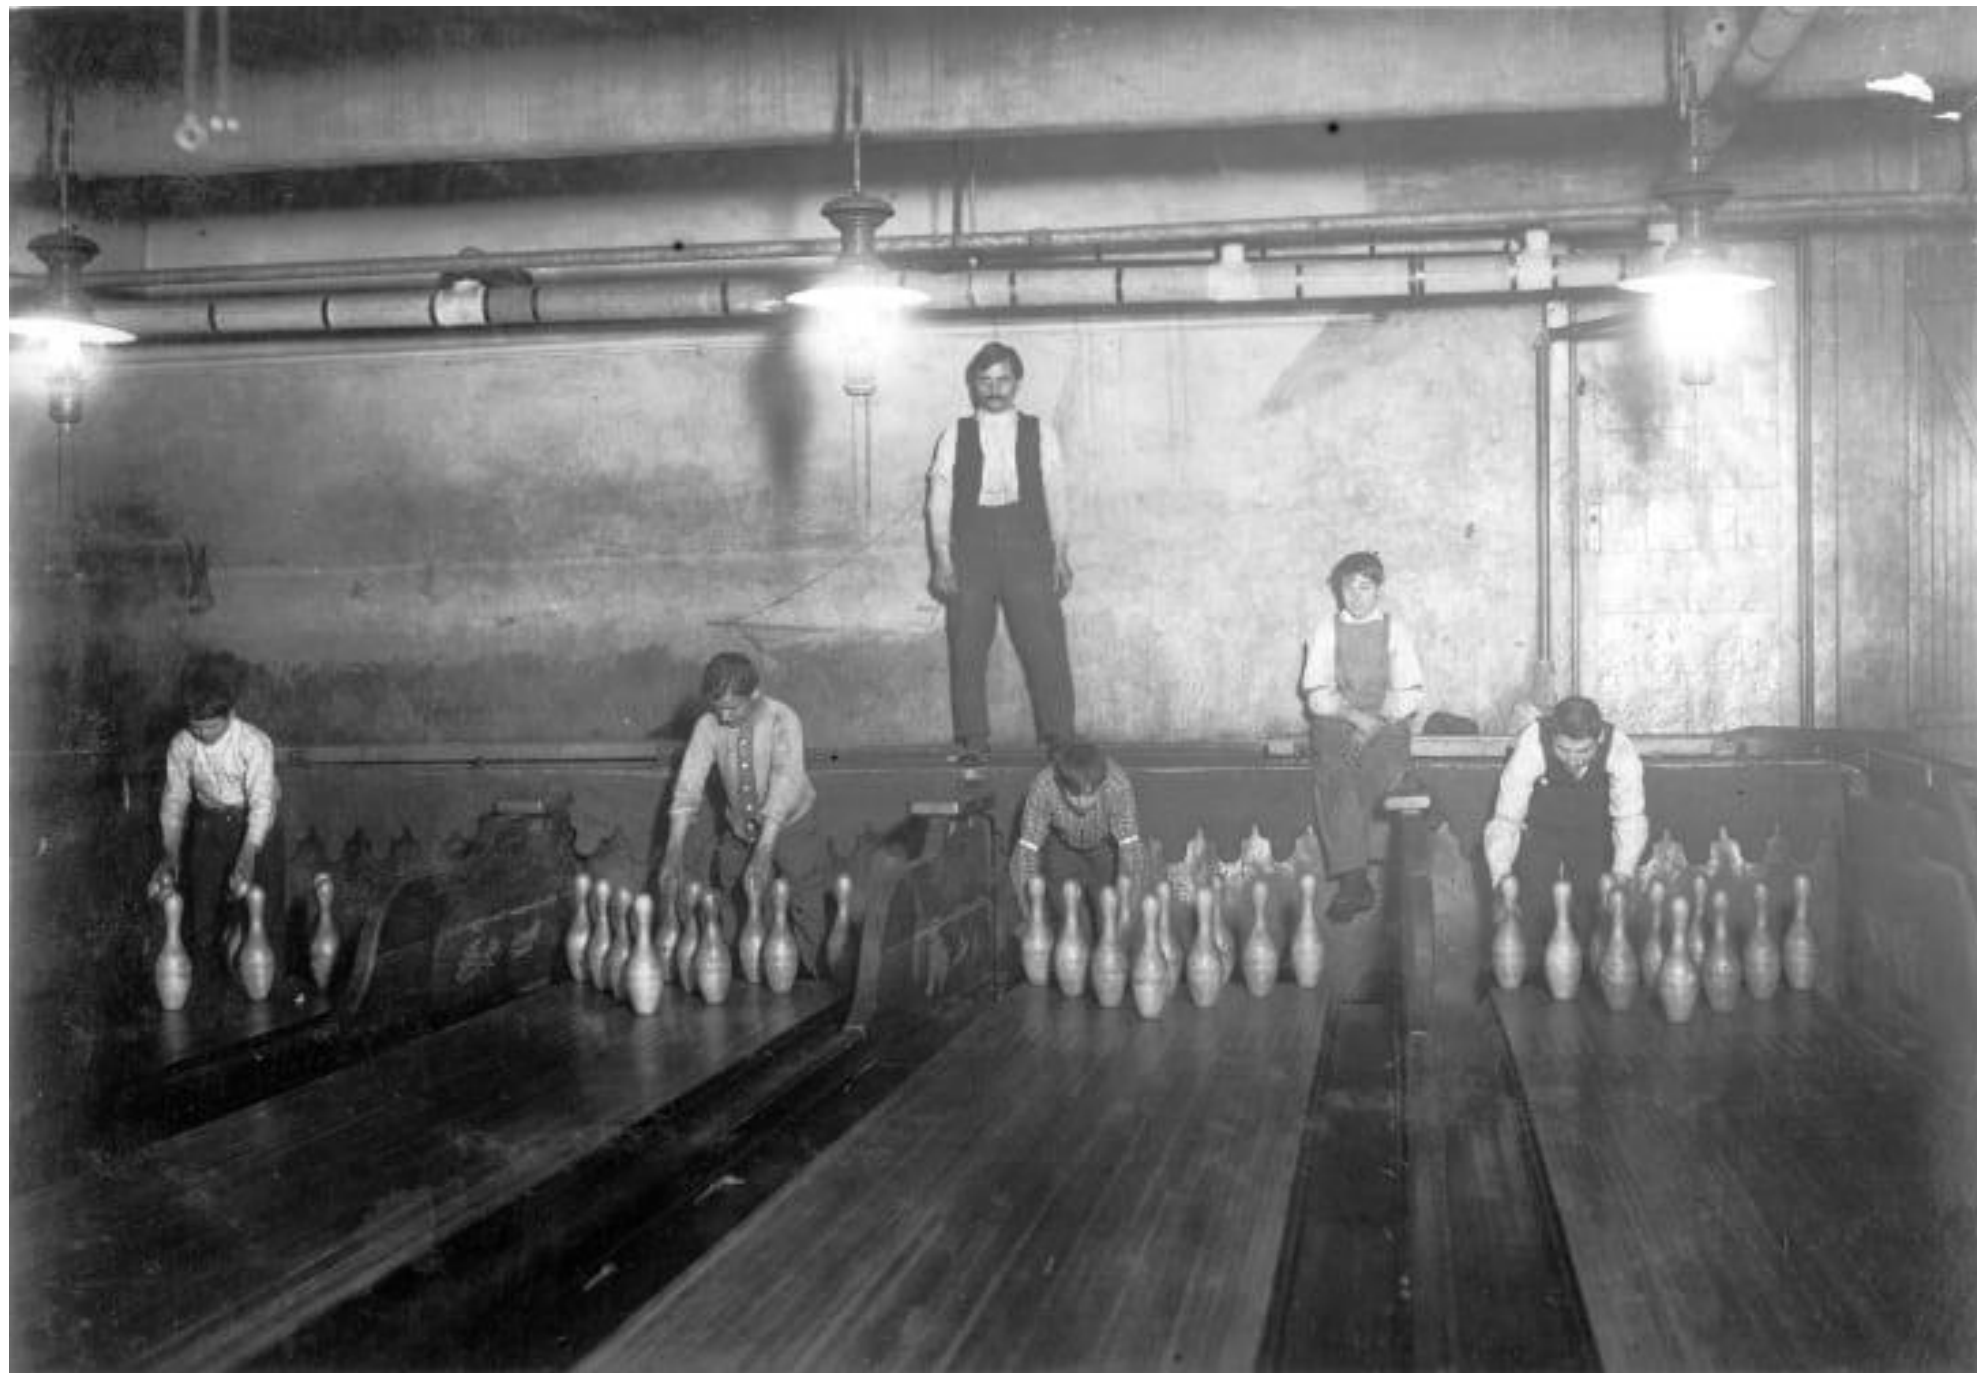

Super AI

Machines that are an order of magnitude smarter than humans

Narrow AI: What to expect

AI can take care of the boring stuff

UPS tracks never turn left! (and save \$350m/year)

Knowledge Bases created by Narrow AI

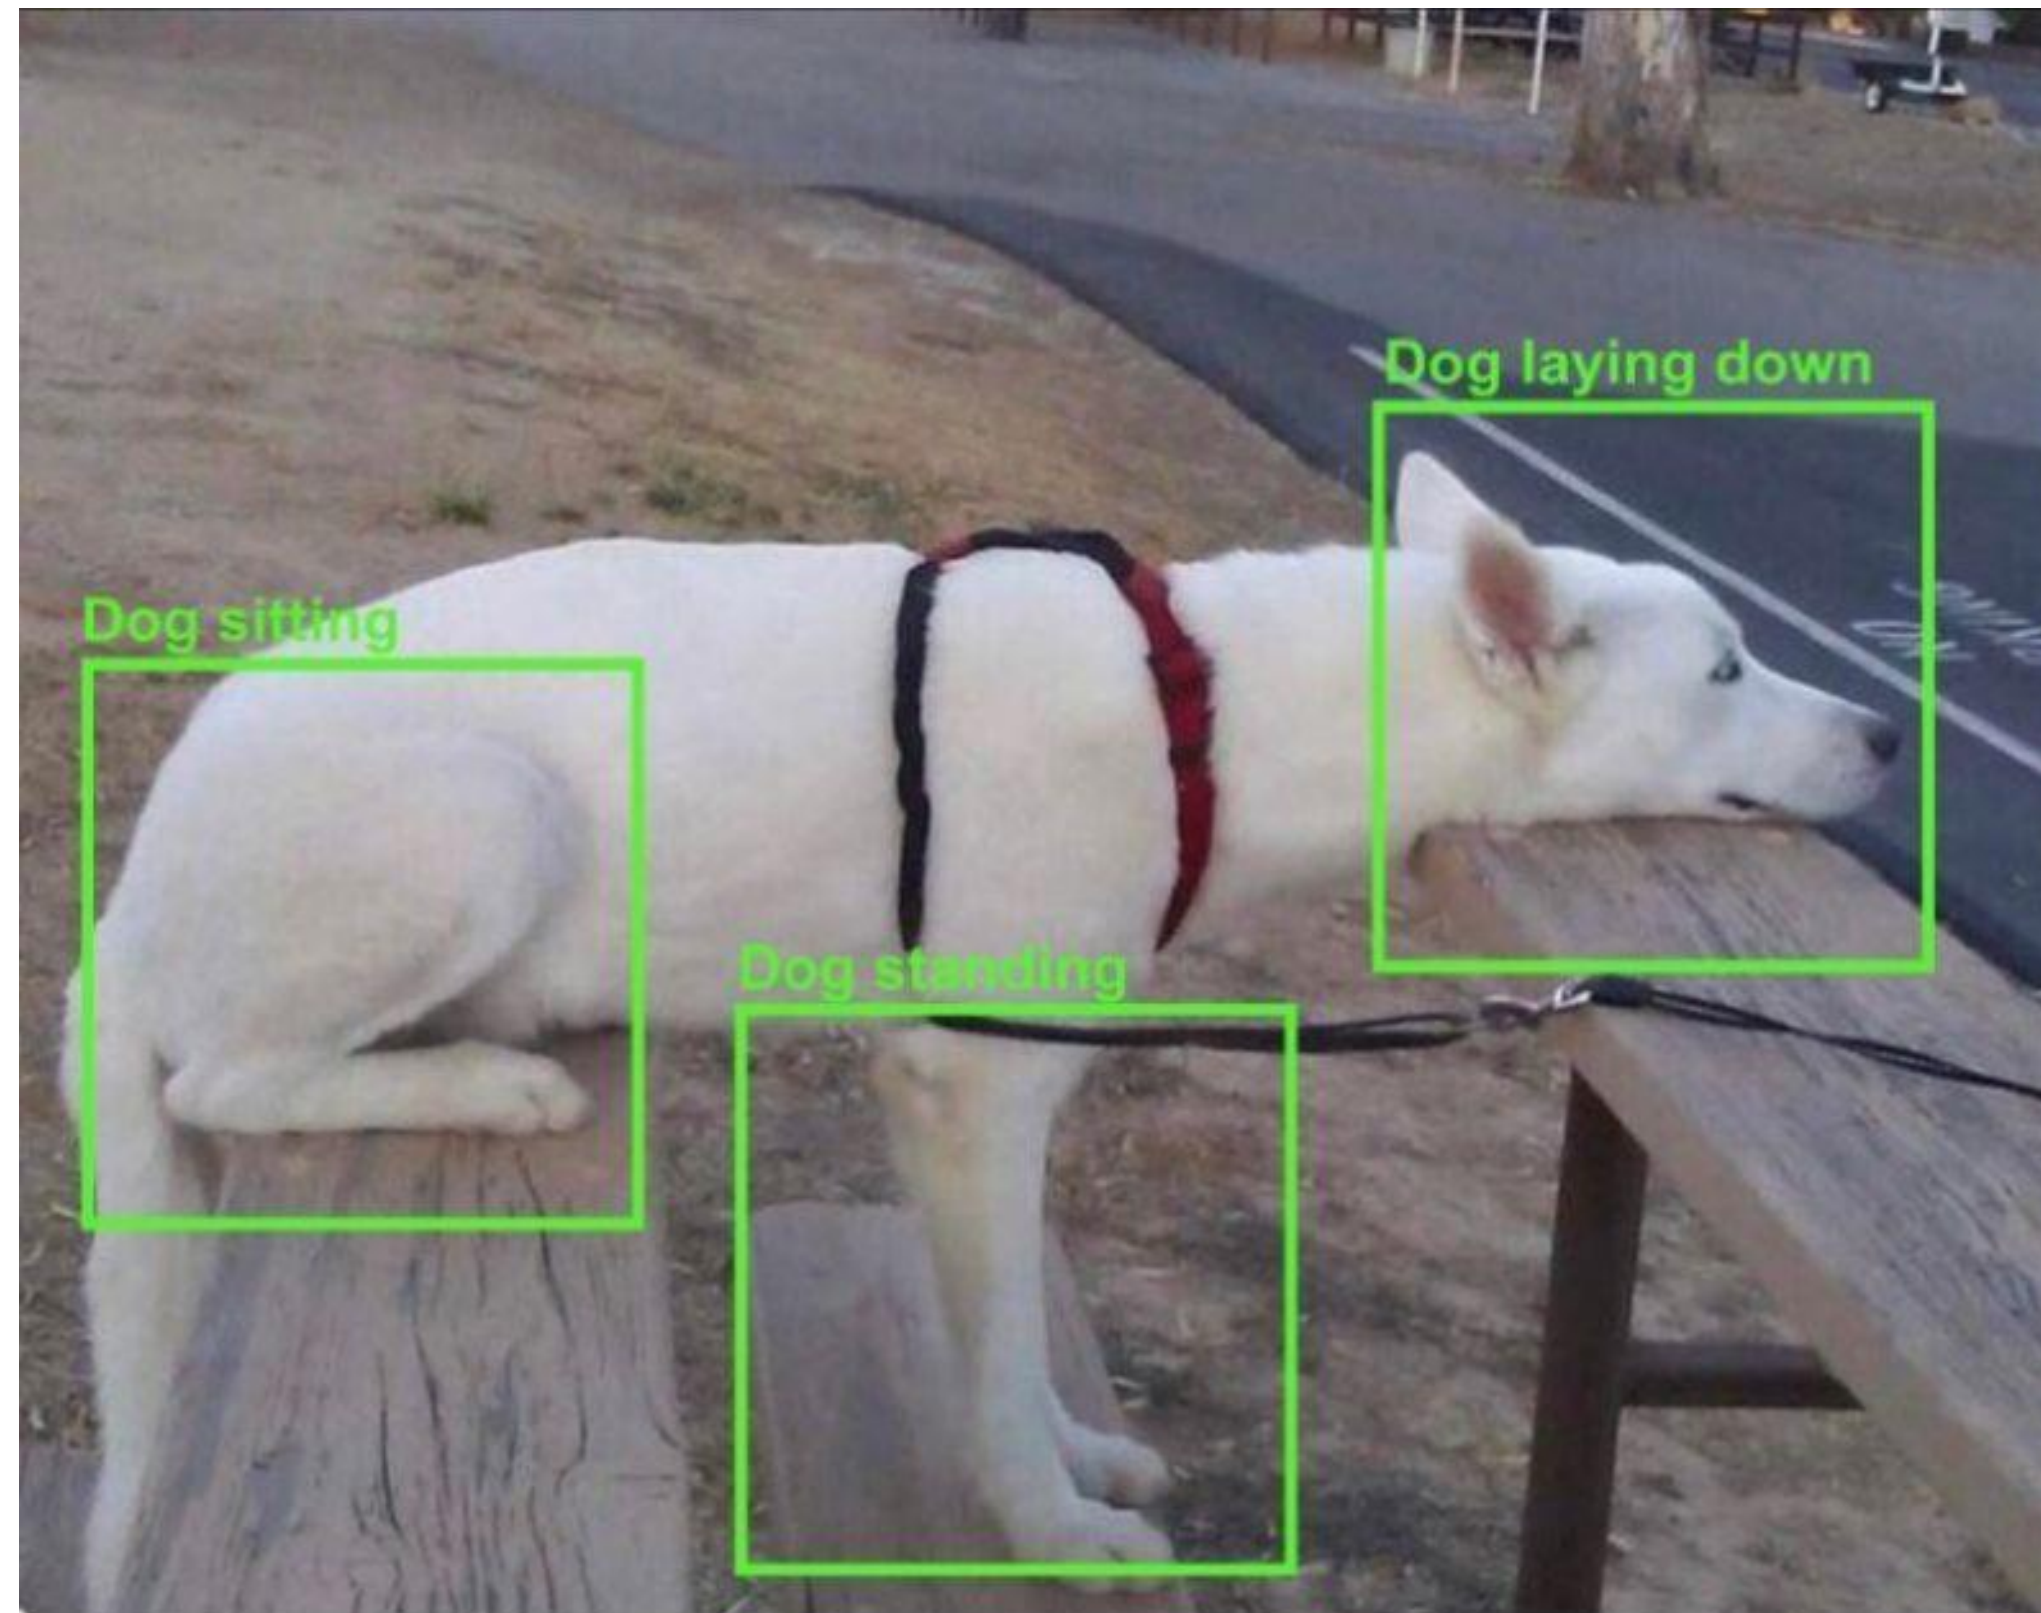

Narrow AI:
has limits

Chihuahua or Muffin?

Narrow AI: has limits

It's hard for Narrow AI to see the bigger picture

I had to prepare my speech for the Commencement Day of Athens MBA. The title of my presentation is The AI tsunami will dominate the workplace.

The future is already here. It's just not evenly distributed yet. Work as we know it is about to change dramatically. In the next 10-20 years, we will see an increase in artificial intelligence (AI) and automation in the workplace. This "AI tsunami" will have a major impact on how we work and live. There are many different opinions on what this future will look like. Some people believe that AI will create more jobs than it destroys. Others believe that AI will lead to mass unemployment and social unrest. Regardless of what you believe, one thing is certain: the AI tsunami is coming and we need to be prepared for it...

Artificial Intelligence Easily Beats Human Fighter Pilot in DARPA Trial

SHARE ARTICLE

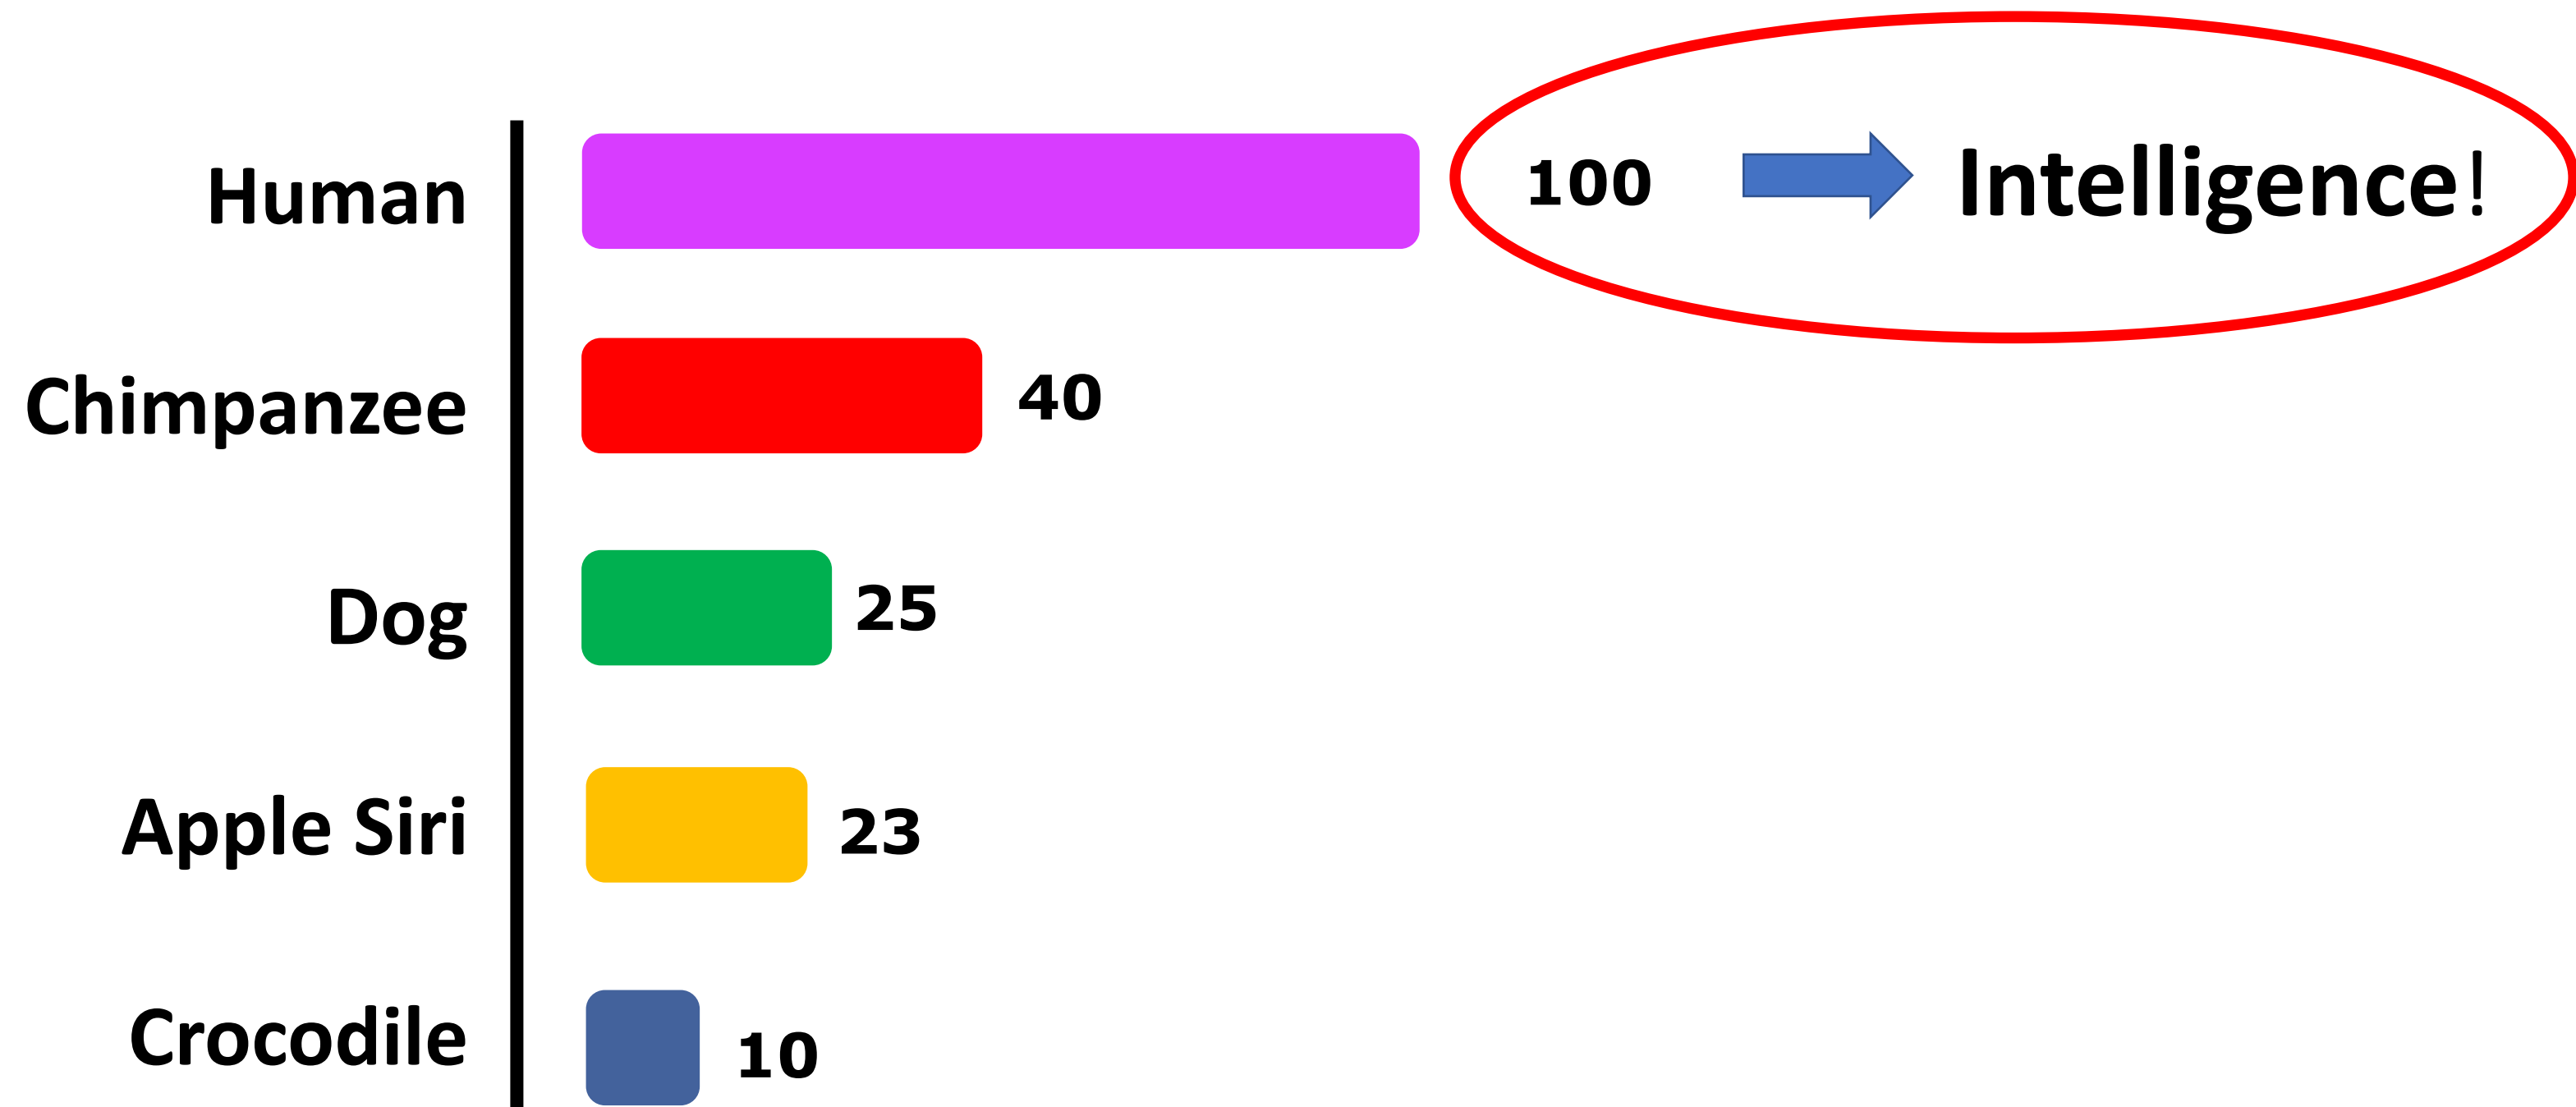

Aug. 20, 2020 | By Brian W. Everstine

In the battle of artificial intelligence versus a human fighter pilot, it wasn't even close.

The artificial intelligence algorithm, developed by Heron Systems, swept a human F-16 pilot in a simulated dogfight 5-0 in the Defense Advanced Research Projects Agency's

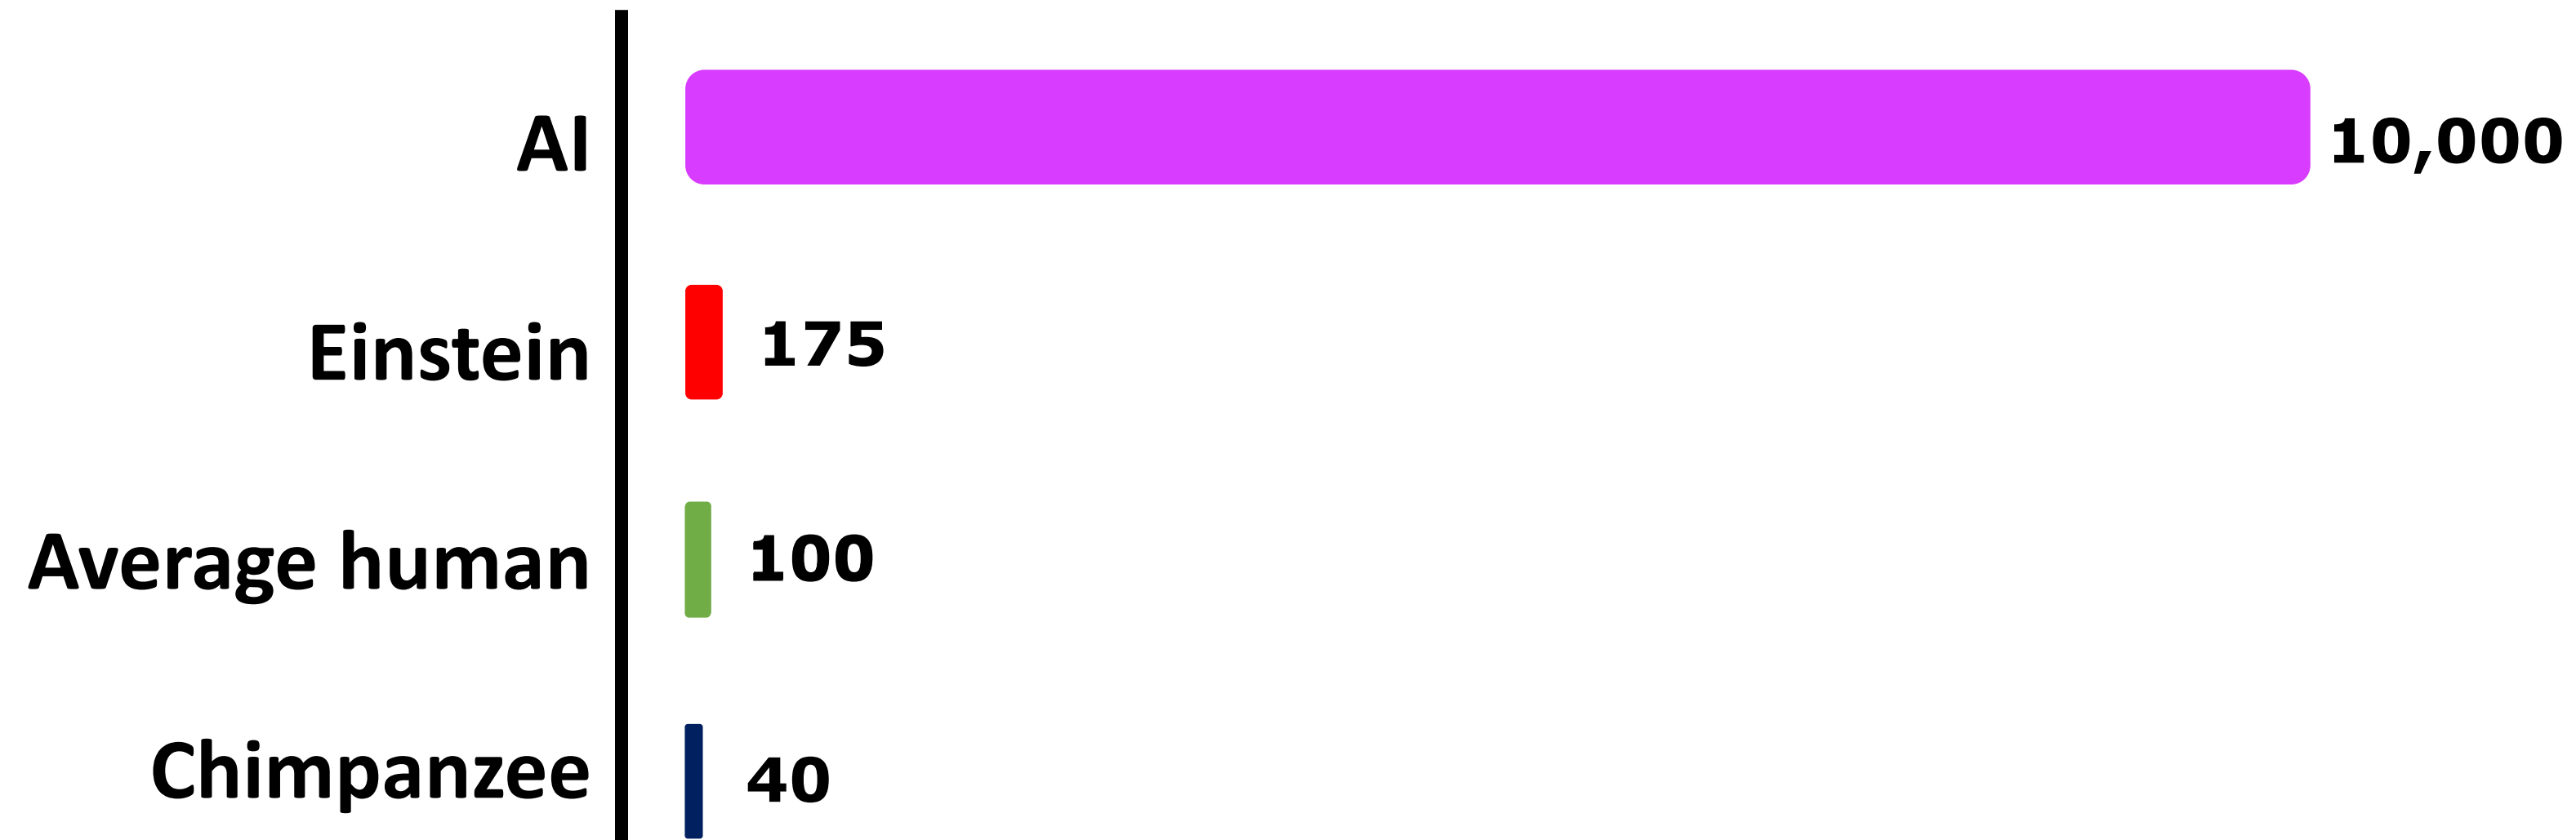

General AI: How we rank intelligence

A woman with blonde hair, wearing a light-colored blazer, is looking at a computer screen. Next to her is a humanoid robot with a white, metallic body and a human-like face. The robot is also looking at the screen. The background is a blurred office or laboratory setting.

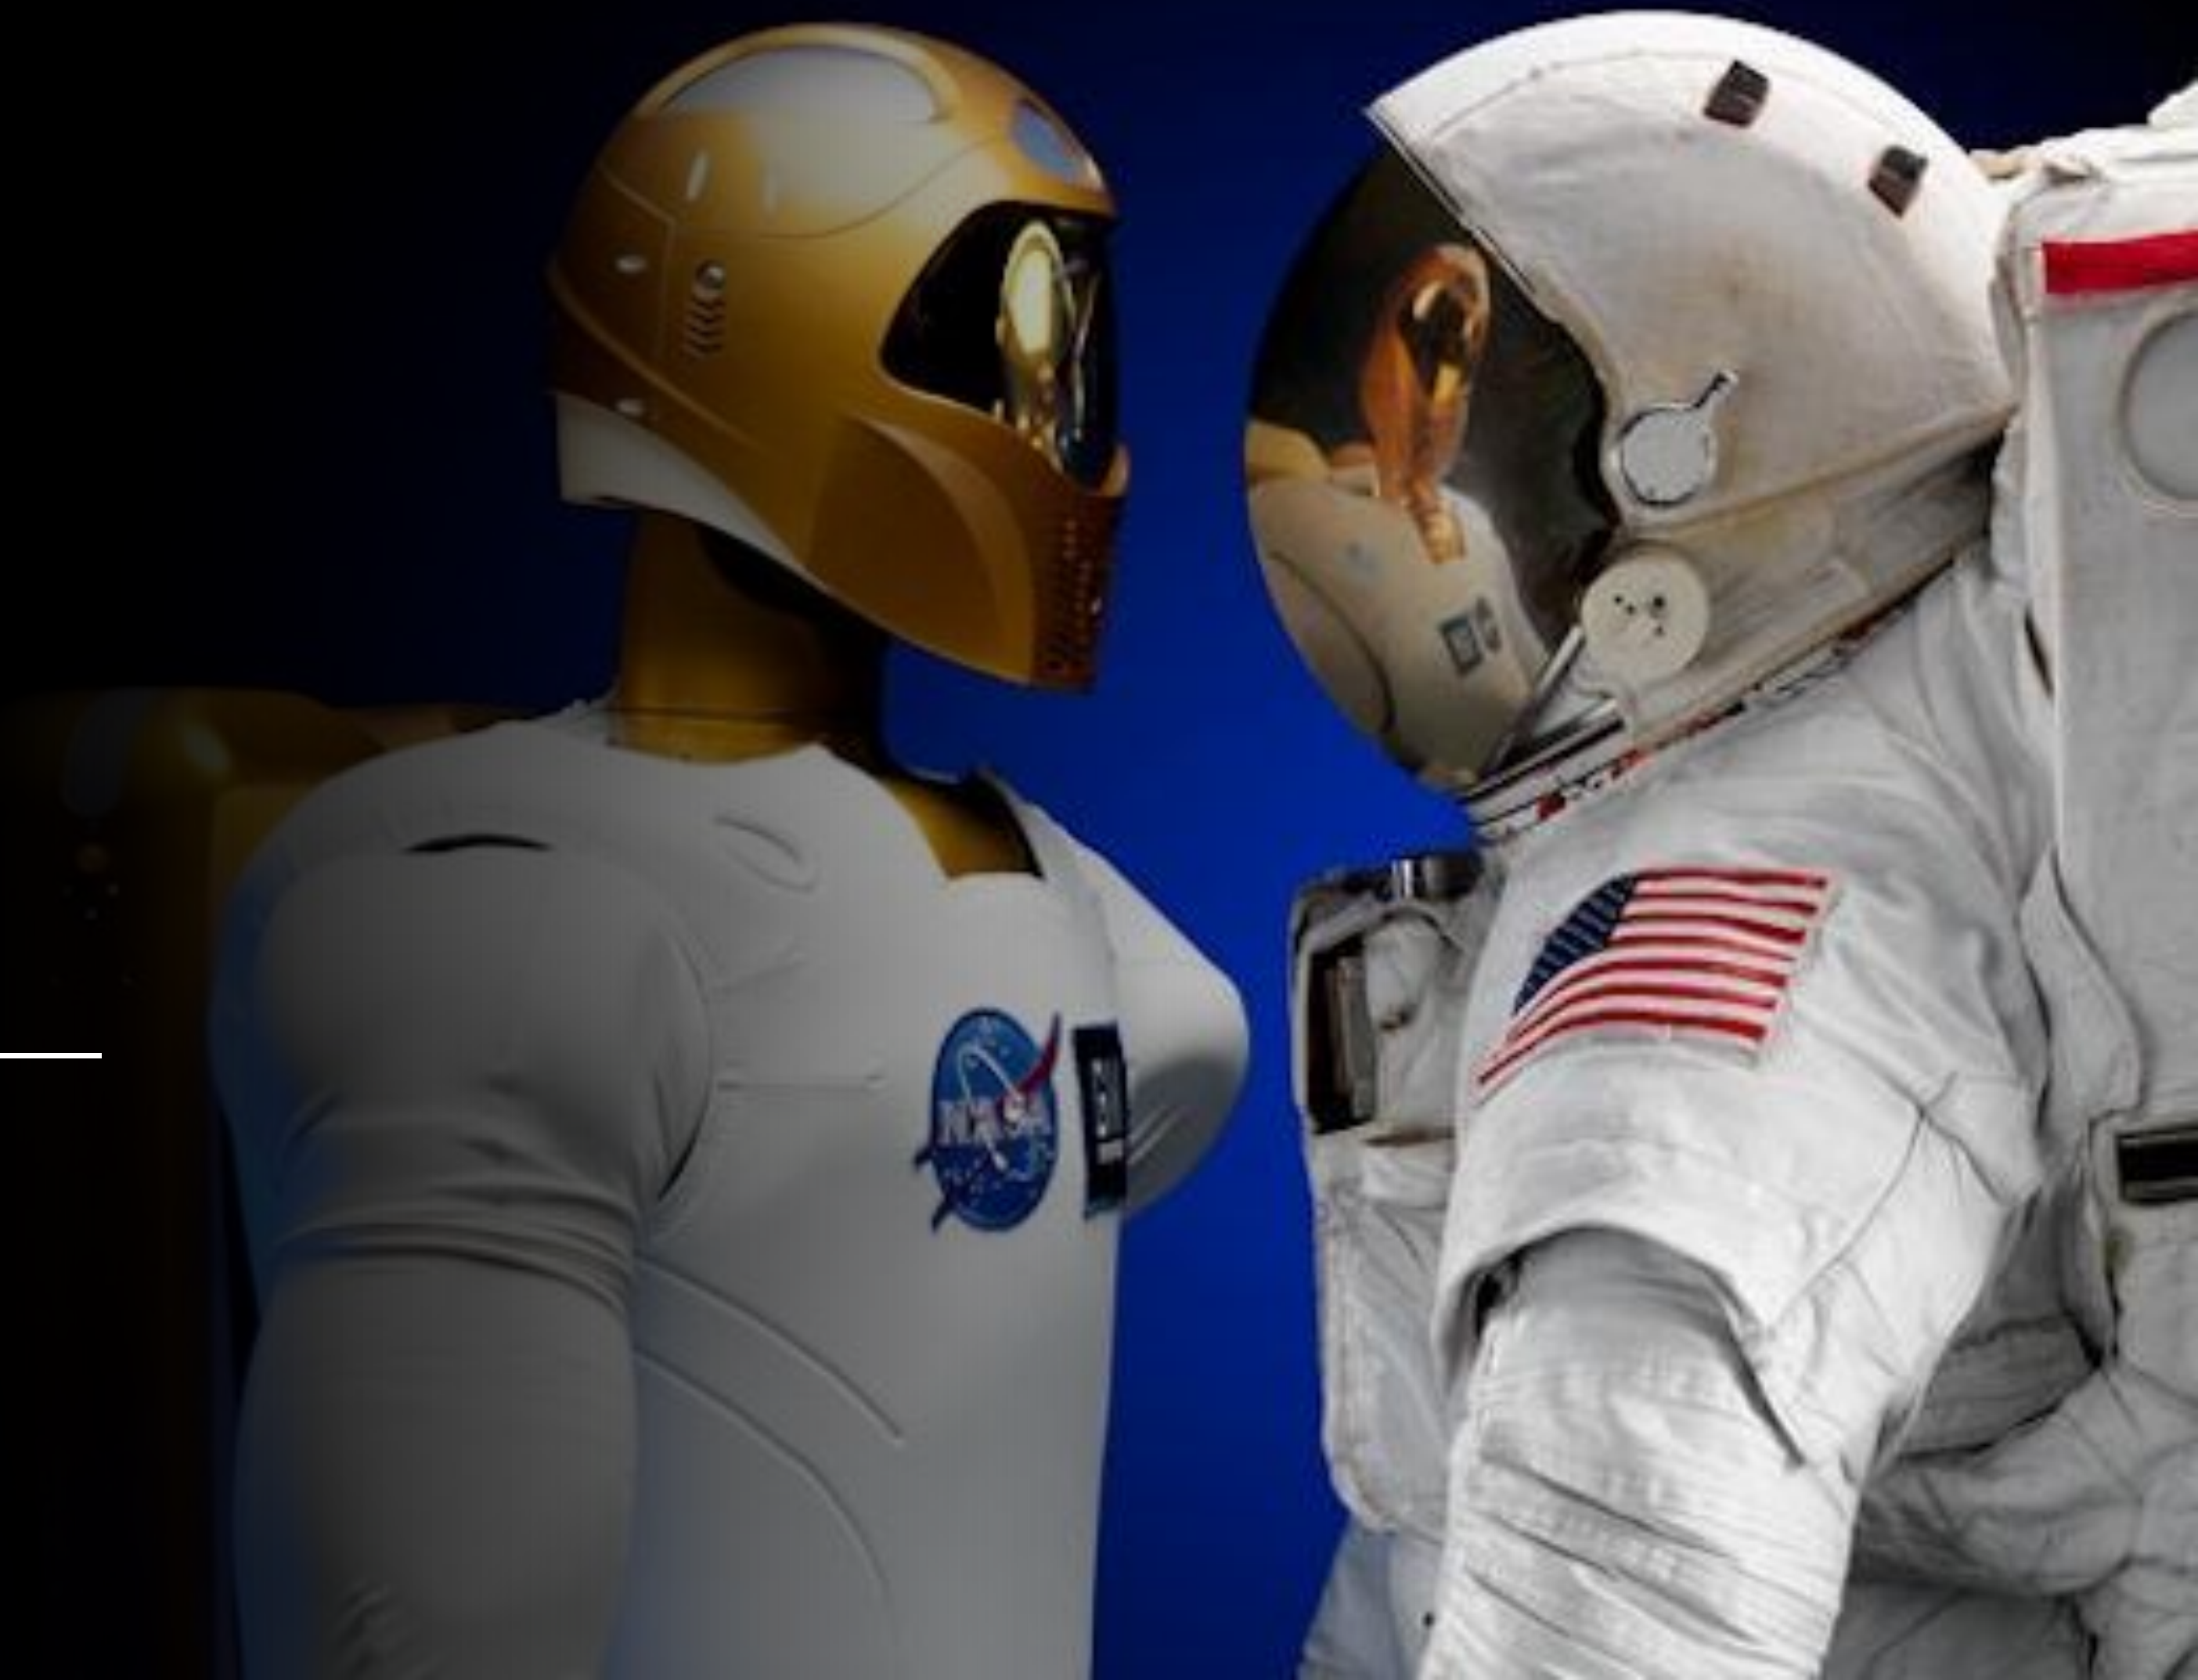

Turning point:
when AI will
code better
than humans

Super AI: how it is to have an IQ of 10,000?

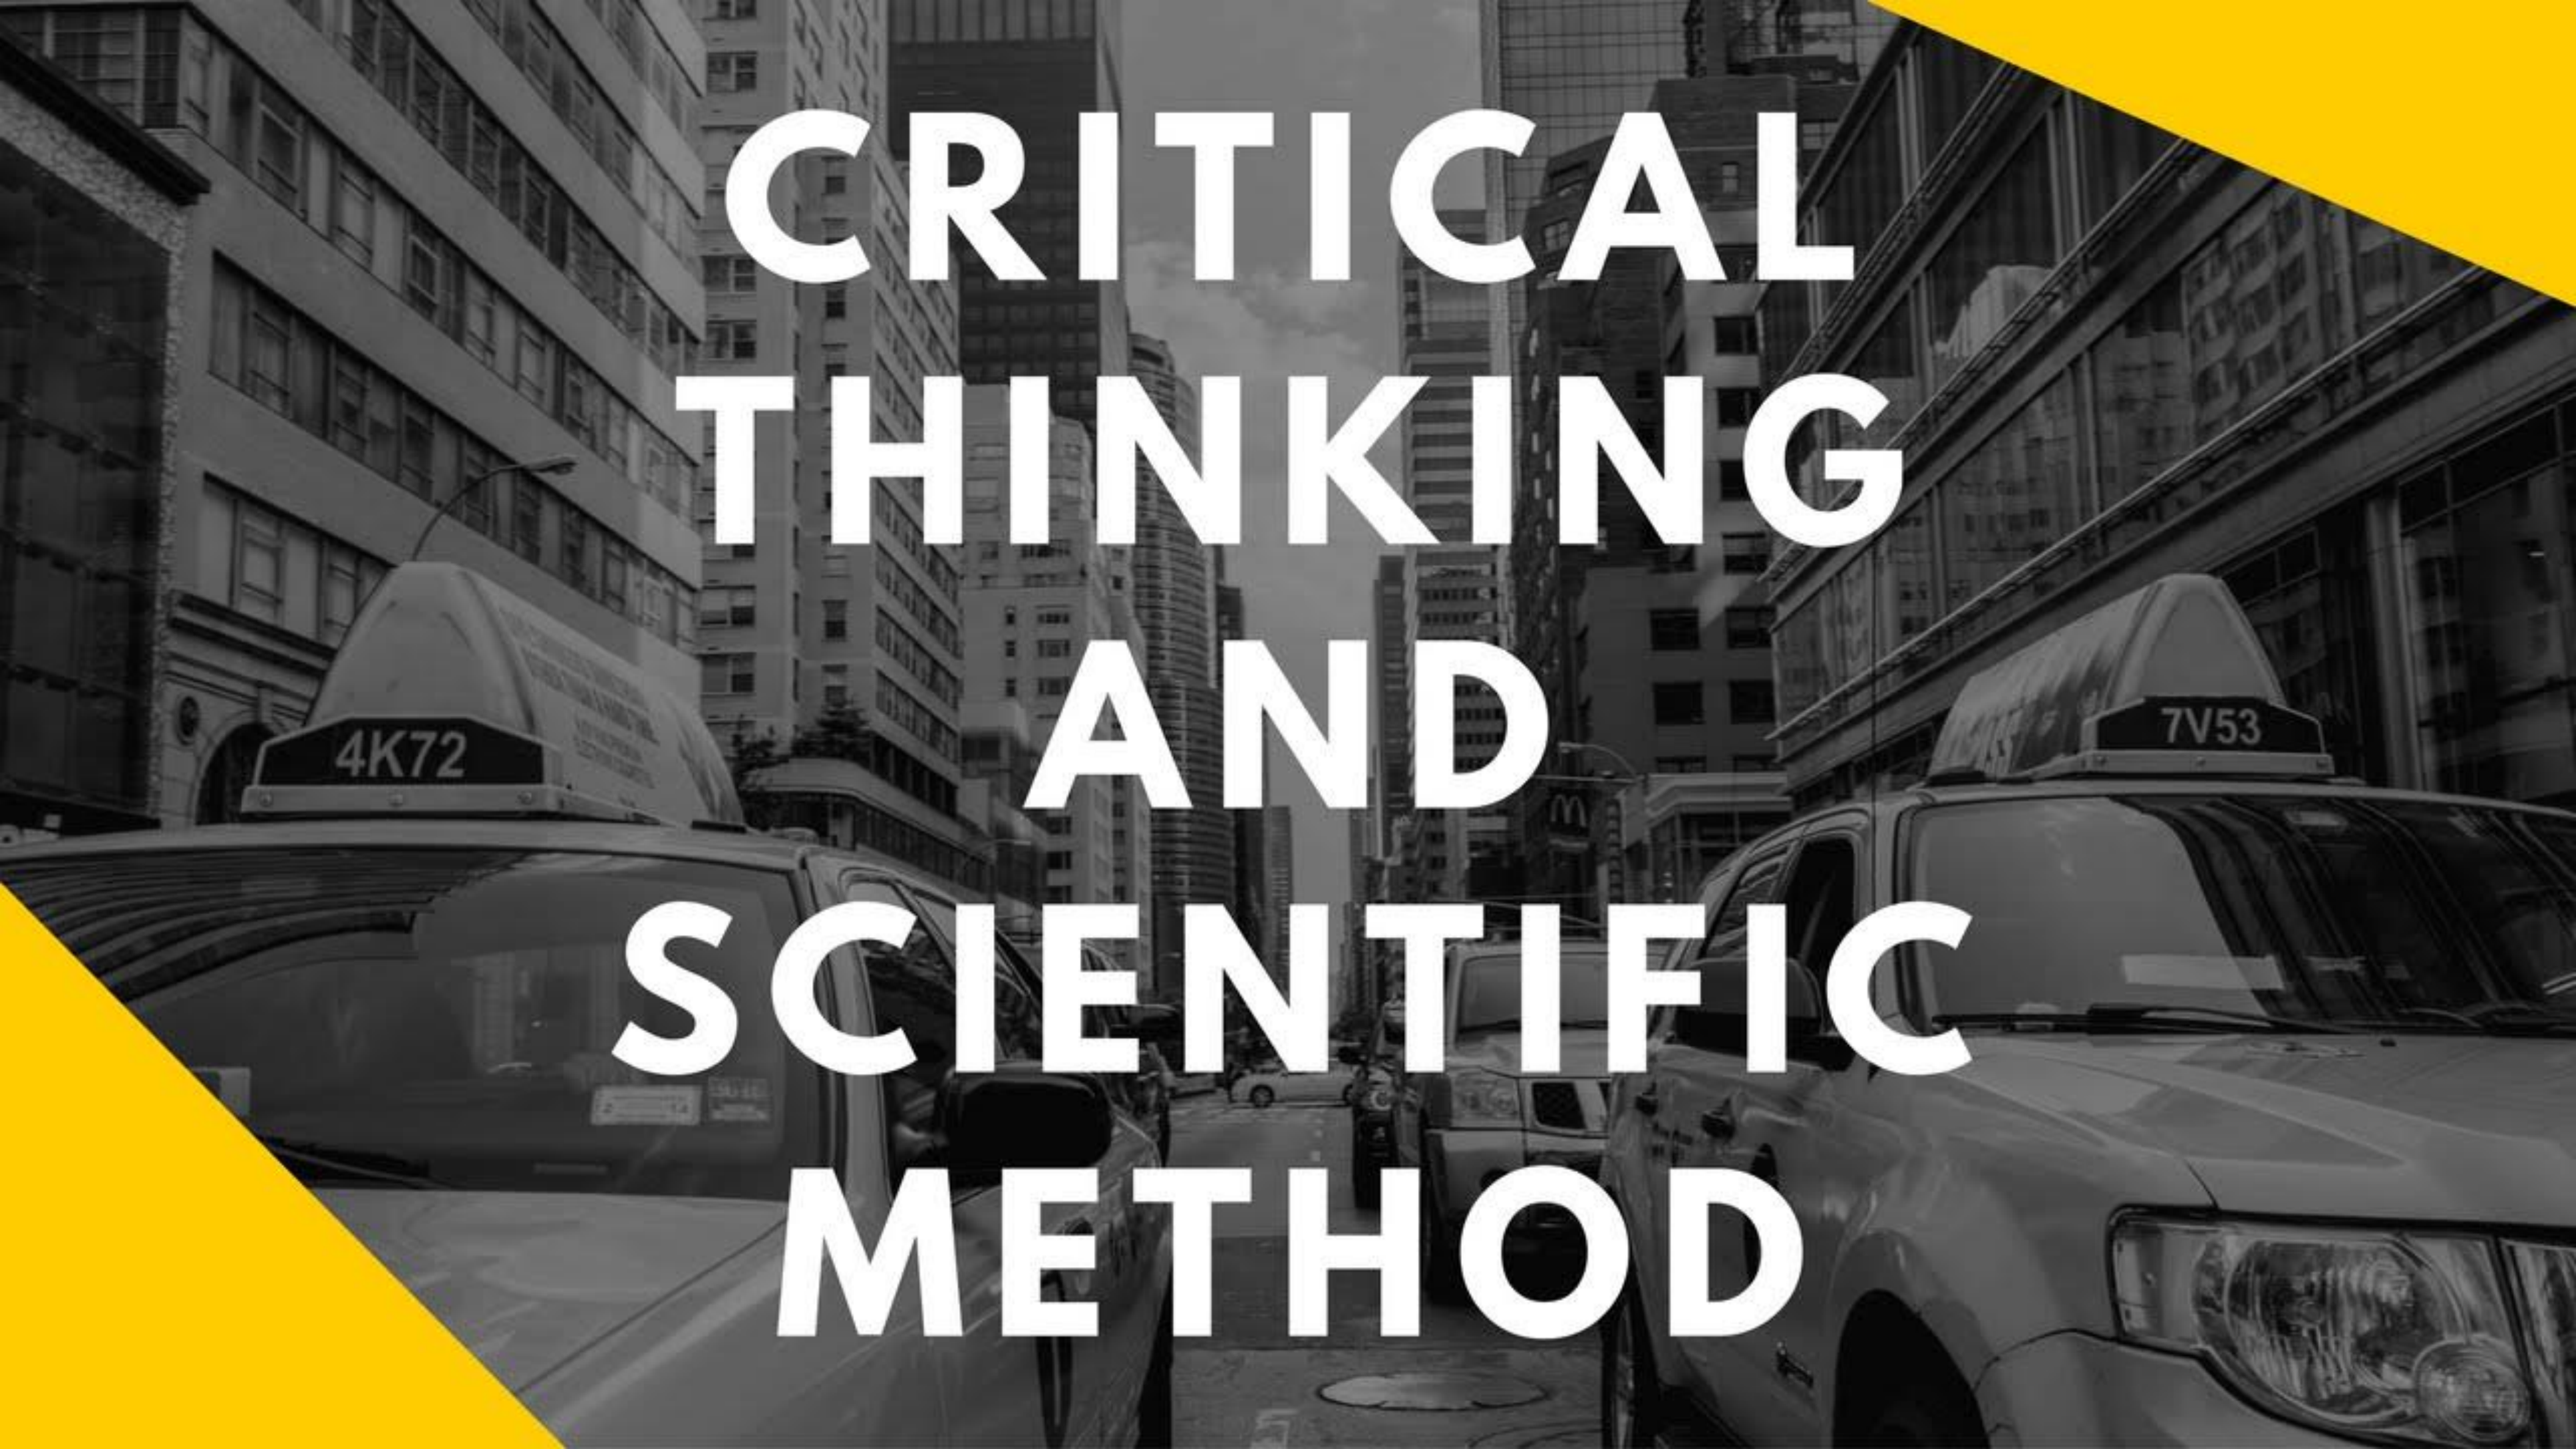

Will the future
be human
centric?

Skills of the future

CRITICAL THINKING AND SCIENTIFIC METHOD

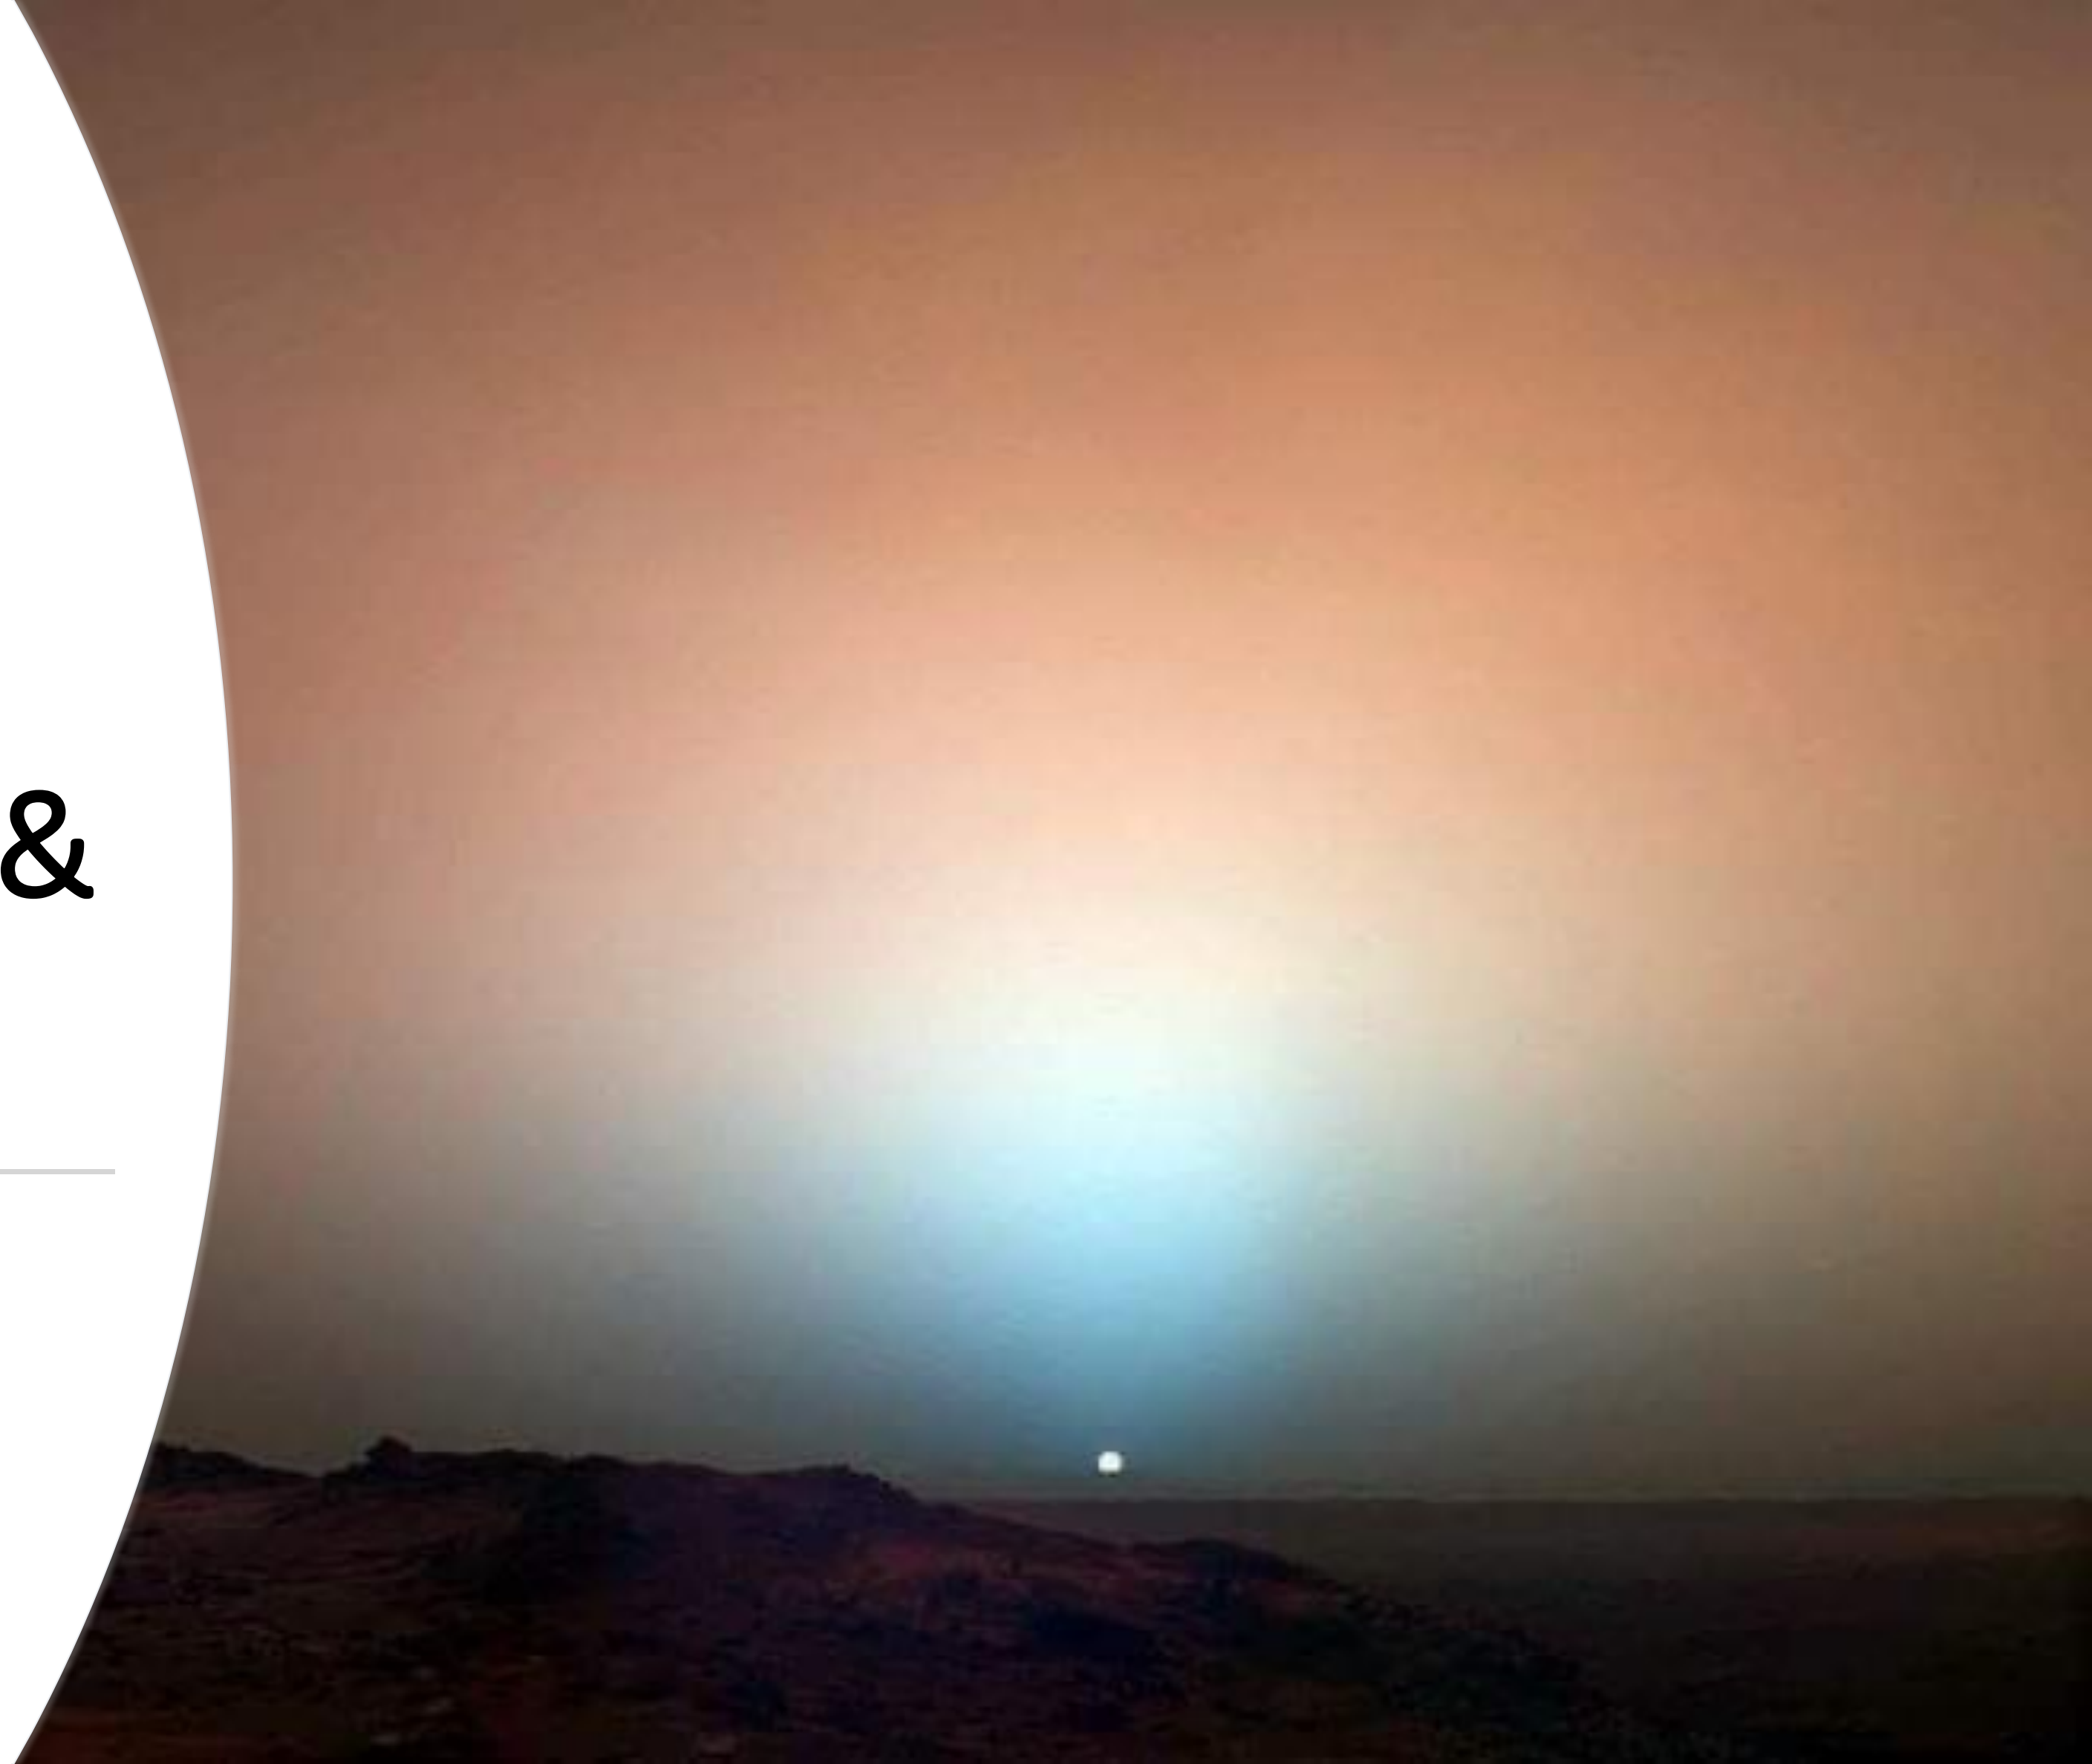

Disclaimer:
Astrology is not science!

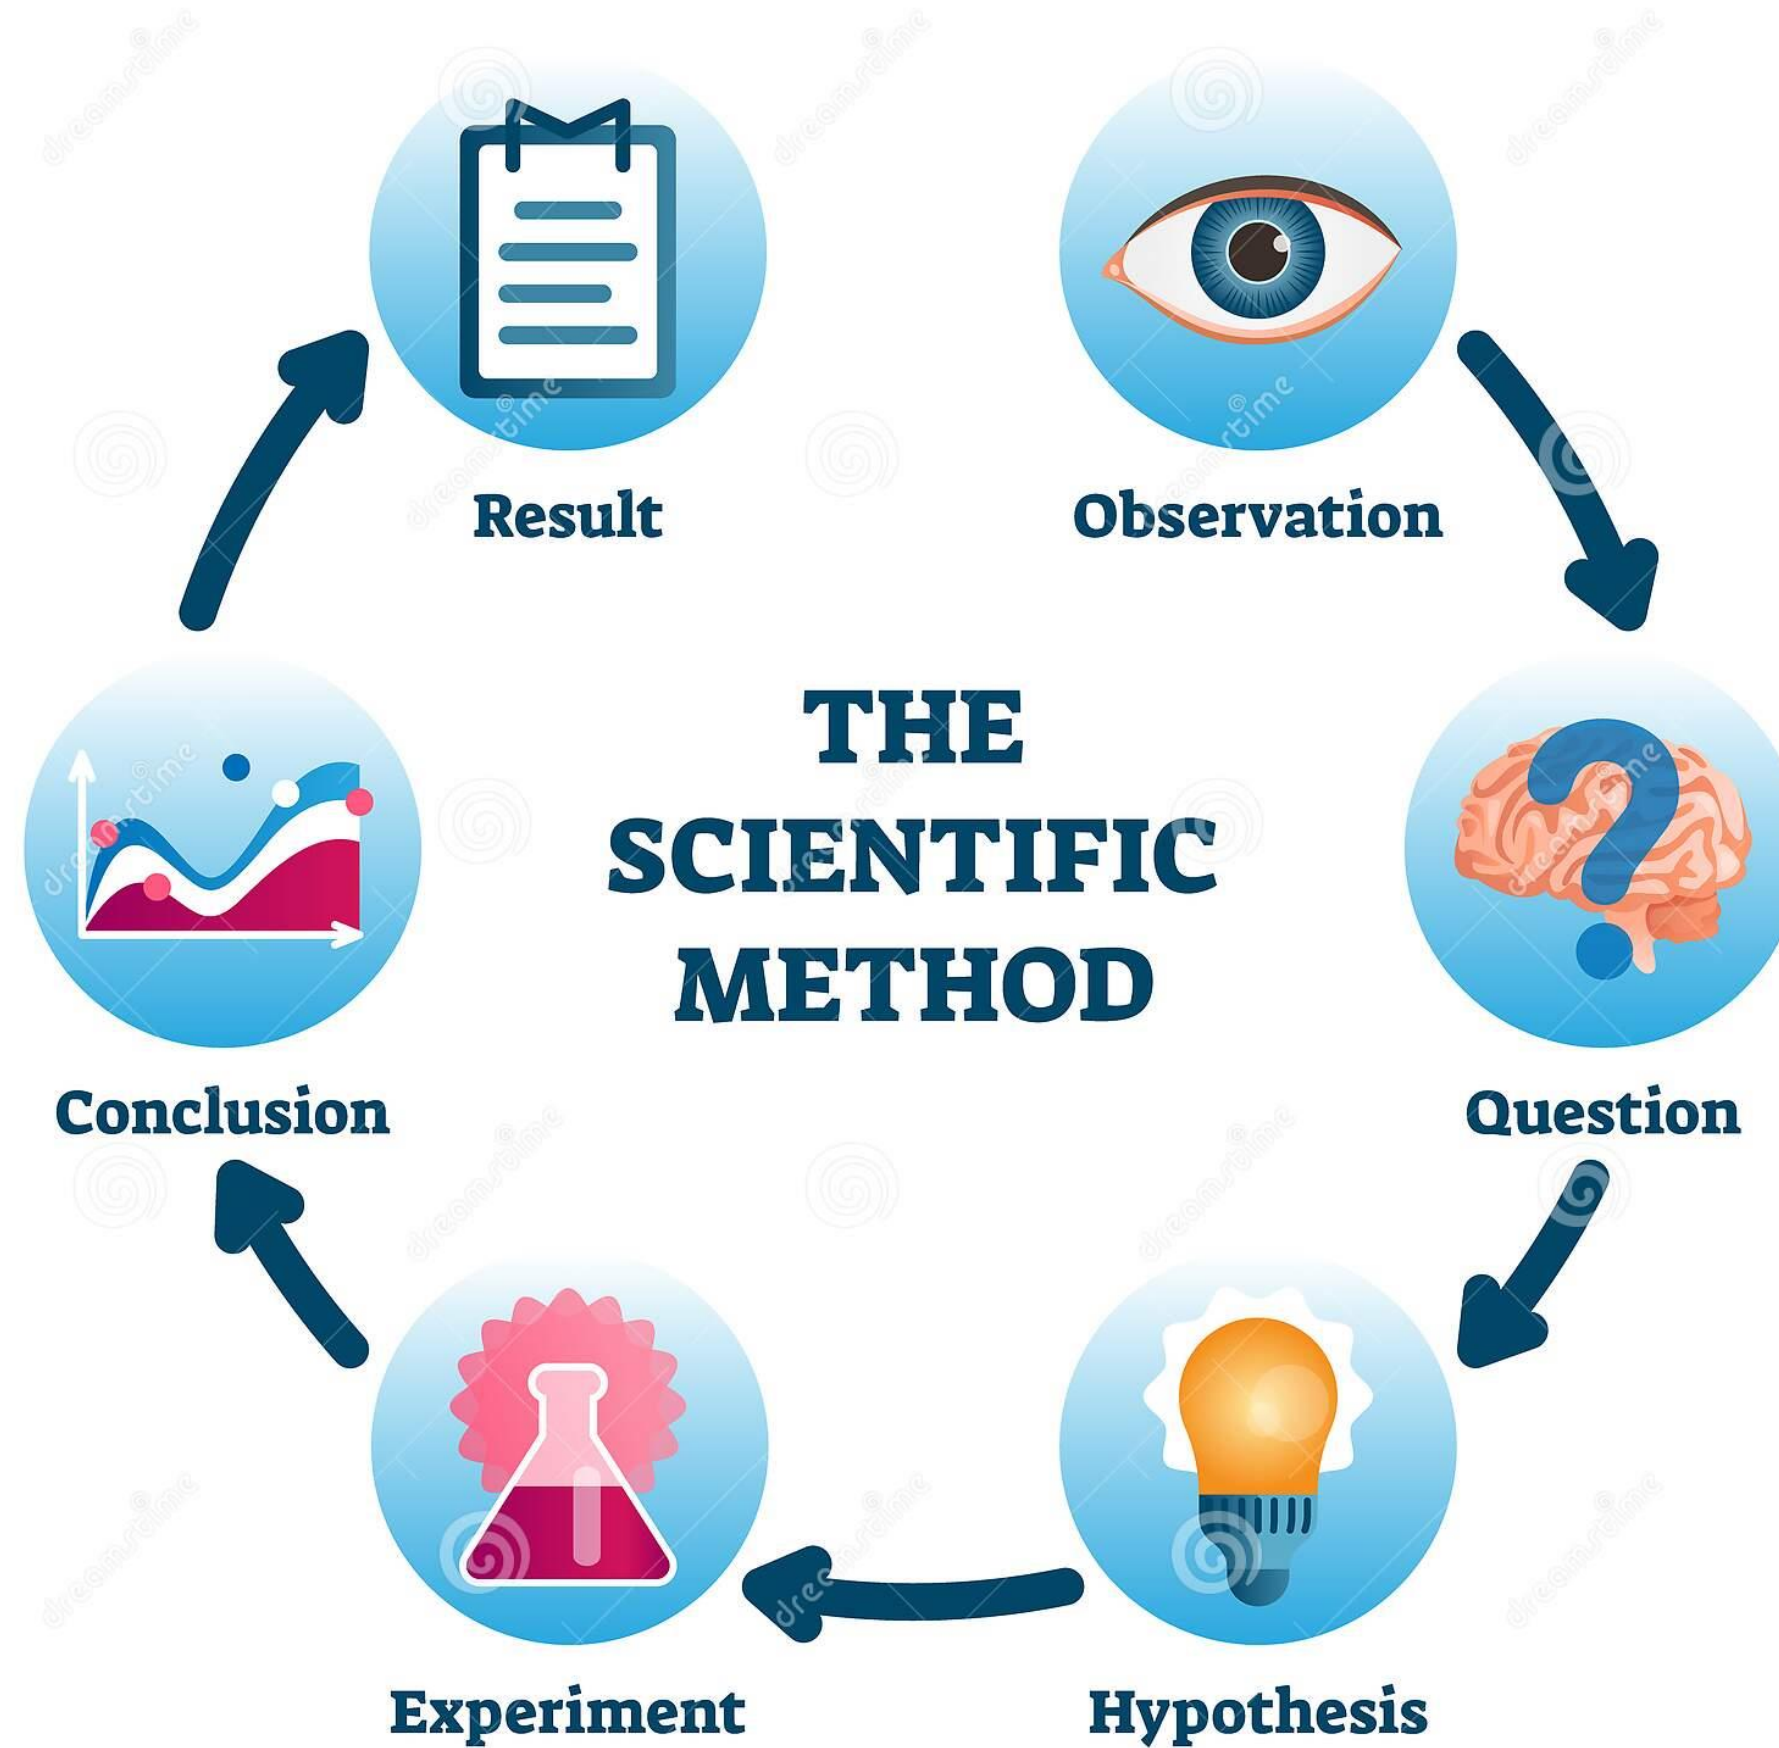

“because Saturn will meet Mars in Capricorn this will be the year to meet your personal goals and travel to new places...”

This is science &
technology!

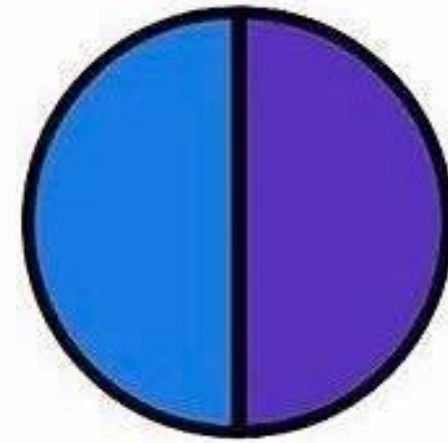

Follow the example of
Haldane:
“Precambrian Rabbits”
